## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by King (US 1,693,147).

King discloses a sheet folding apparatus comprising rotating folding rollers 10 and 11; reciprocatory pressing means 17; and means for providing rotation (not shown); figure 1. King discloses high 14 and low (15 and 18) friction regions on rollers 10 and 11; see figure 2.

Regarding claim 4, high friction region 14 in the middle of figure 2 on roller 10 is narrower than leftmost high friction region 14 on roller 11.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirose (US 6,022,011) in view of King (US 1,693,147).

Hirose teaches a sheet finisher in an image forming unit utilizing a sheet folding apparatus with pressing means 11; paired rollers 15. One roller 15 is positioned lower (offset) from the other. Hirose does not provide for reducing the pressure on the outer most sheet, however King provides rollers 10 and 11 for preventing slippage; see above. It would have been obvious to one of ordinary skill in the art to use the teachings of King in the invention to Hirose to fold the sheet bundles.

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
